Equity Outlook

Indian equities ended the month of May on a positive note, with the Nifty up 2.6%. Mid-cap and small-cap indices outperformed large-cap indices and were up 6% and 5%, respectively. FPIs bought US\$4.2 bn of Indian equities in the secondary market, whereas DIIs sold US\$406 mn. Other key developments in the month were: (1) the US Federal Reserve increased interest rates by 25 bps and hinted at a potential pause in the rate hike cycle, (2) the RBI notified the withdrawal of Rs2,000 denominated bank notes (introduced in November 2016), while they will continue to be legal tender, (3) the Indian Meteorological Department (IMD) retained its forecast of a normal south-west monsoon at 96% of the long-period average (LPA), (4) US lawmakers voted to raise the national borrowing limit to avert a catastrophic default.

High frequency indicators (like E-way bill, GST collection, loan growth, PMI) suggest healthy level of economic activity. India's CPI slid below the 5% mark for the first time in 2023 to touch 4.7% in April 2023. WPI based inflation for the month of April contracted by 0.9% compared to 1.3% in March 2023 primarily due to favorable base effects and continued softening in commodity prices. Meanwhile, IIP rose by 1.1% YoY in Mar'23, below Bloomberg consensus expectation of 3.2%. Manufacturing growth was sluggish at 0.5% YoY in Mar'23 while Electricity production declined by 1.6% YoY. Within Manufacturing, Consumer Durables output sustained its declining trend and was down by 8.4% YoY while Consumer Non-durables output declined by 3.1% YoY. The Gross GST revenue collected in the month of May, is Rs 1.57tn up 12% yoy Diesel & Petrol sales jump 9.3% & 10.3% respectively in May'23.

Overall growth momentum continued in Q4FY23 with Nifty 50 delivering 19% earnings growth. Amid a volatile global macro backdrop, India Inc provided some comfort as corporate earnings

- **BFSI** - Among the Financial companies, Strong core performance continued in Q4FY23, with strong loan growth, sharp margin expansion, and sustained improvement in asset quality. Credit offtake has been robust for the system, loan growth in Q4FY23 stood at 3% QoQ / 15% YoY (as per RBI data).
- **IT** - In Q4FY23, IT sector witnessed growth moderation, with revenue growth slowing down to 17% YoY (the slowest in last few quarters) and almost flat QoQ. This is because macro uncertainty leads to slower conversion of order book to revenues. Ebitda margins have remained flattish both YoY/QoQ.
- **Consumer** - Divergence between categories: Staples companies reported steady top-line performance; while most Consumer Discretionary names reported poor sets of results, on the back of slow consumer demand. Gross margins continue to improve sequentially with the easing of commodity inflation.
- **Cement** - Q4FY23 aggregate EBITDA was stable YoY, as sustained strong volume growth offset impact of YoY decline in unit EBITDA. Trend of QoQ uptick in unit EBITDA continued in Q4 with benefit of energy cost decline and Operating leverage.
- **Autos** - Auto volumes in Q4FY23 recovered across segments, supported by improvement in the supply of semiconductor chips and continuation of strong demand. Demand momentum sustained in PVs and CVs, while 2Ws and tractors saw good recovery.
- **Pharma/Chemicals** - Growth continues to be strong with multiples macro drivers in play, however supply side constraints and high volatility in raw material prices have kept margins under check.

Overall, at the portfolio level, we continue to remain invested into high quality businesses that have stood test of times and likely to come out stronger post crisis. We remain invested on high quality franchisees and expect these businesses to continue to deliver healthy earnings growth over the medium to long term.

Core Equity Portfolio

Investment Theme

The strategy aims to invest in businesses having sustainable growth over long-term in select industries, which endeavors to make up for most of the GDP growth patterns. It is a Multicap portfolio unconstrained by any market segments.
