Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing deemed to be prescribed under section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. 2 Significant accounting policies

The accounting policies set out below have been applied consistently to the periods presented in these financial statements

2.1 Basis of preparation

These financial statements have been prepared in accordance with the generally accepted accounting principles in India under the historical cost convention on accrual basis. Pursuant to section 133 of the Companies Act, 2013 read with Rule 7(1) of the Companies (Accounts) Rules, 2014, till the standards of accounting or any addendum thereto are prescribed by Central Government in consultation and recommendation of the National Financial Reporting Authority, the existing Accounting Standards notified under the Companies Act, 1956 shall continue to apply. Consequently, these financial statements have been prepared to comply in all material aspects with the accounting standards notified under Section 211(3C) of the Companies Act, 1956 [Companies (Accounting Standards) Rules, 2006, as amended] and other relevant provisions of the Companies Act, 2013.

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III (Division I) to the Companies Act, 2013. Based on the nature of services and the time between the rendering of services for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current – non current classification of assets and liabilities.

2.2 Use of estimates

The preparation of the financial statements in conformity with generally accepted accounting principles ('GAAP') requires management to make estimates and assumptions that affect the reported amount of assets, liabilities and disclosure of contingent liabilities on the date of the financial statements and the reported revenue and expenses during the reporting period. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements. Actual results may differ from those estimates. Any revision to accounting estimates is recognised prospectively in current and future periods.

2.3 Fixed assets and depreciation

Fixed assets are stated at cost of acquisition less accumulated depreciation / amortisation & impairment loss if any. Cost includes all expenses incidental to the acquisition of the fixed assets and any attributable cost of bringing the asset to its working condition for its intended use. Subsequent costs related to an item of Property, Plant and Equipment are recognised in the carrying amount of the item if the recognition criteria are met. An item of Property, Plant & Equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. The gain or loss arising on derecognition is recognised in the statement of Profit and Loss. Depreciation is charged over the estimated useful life of a fixed asset on a straight line basis.

Further, as disclosed in table below, based on technical evaluation done by management's expert, the estimated useful life of fixed assets of the Company is different from useful life prescribed in Schedule II of the Companies Act, 2013. Based on the nature of fixed assets used by the Company and past experience of its usage, the Company considers that the useful life for respective assets to be appropriate.

Nature of Fixed Assets	Management Estimate of Useful Life in years	Useful life as per the limits prescribed in Schedule II of the Companies Act, 2013 in Years
Furniture & fixtures	6	10
Computers – (Servers & Networks)	3	6
Office Equipment	3 -10	5
Vehicles	5	8

Depreciation is provided on a pro-rata basis on the straight-line method over the estimated useful lives of the assets, in order to reflect the actual usage of the assets. The depreciation charge for each period is recognised in the Statement of Profit and Loss, unless it is included in the carrying amount of any other asset. The useful life, residual value and the depreciation method are reviewed at least at each financial year end. If the expectations differ from previous estimates, the changes are accounted for prospectively as a change in accounting estimate.

Intangible assets are stated at acquisition cost, net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortised on a straight line basis over their estimated useful lives. A rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use is considered by the management. The amortisation period and the amortisation method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortisation period is changed accordingly.

Gains or losses arising from the retirement or disposal of an intangible asset are determined as the difference between the net disposal proceeds and the carrying amount of the asset and recognised as income or expense in the Statement of Profit and Loss.

2.3 Fixed assets and depreciation (*continued*)

Leasehold improvements are amortised over the period of the lease on straight-line basis or useful life of the asset whichever is lower.

Intangible assets comprising software purchased or developed and licensing costs are depreciated on straight line basis over the useful life of the software up to a maximum of three years commencing from the month in which such software is first utilised.

Assets individually costing Rupees Five Thousand or less are fully depreciated in the year of purchase or acquisition.

The Company provides pro-rata depreciation from the day the asset is ready to use and for any asset sold, till the date of sale.

2.4 Impairment of assets

The Company assesses at each balance sheet date whether there is any indication that an asset (tangible and intangible) may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset to which the asset belongs to or the cash generating unit. If such estimated recoverable amount of the asset is less than the carrying amount, the carrying amount is reduced to its estimated recoverable amount. The reduction is treated as an impairment loss and is recognised in the statement of profit and loss.

Assessment is also done at each balance sheet date as to whether there is any indication that an impairment loss recognised for an asset in prior accounting periods may no longer exist or may have decreased. An impairment loss is reversed to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had previously been recognised.

2.5 Investments

Investments that are readily realisable and are intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long term investments. Current investments are carried at cost or fair value, whichever is lower. Long-term investments are carried at cost. However, provision for diminution is made to recognise a decline, other than temporary, in the value of long-term investments, such reduction being determined and made for each investment individually.

Purchase and sale of investments are recorded on trade date. The gains or losses on sale of investments are recognised in the statement of profit and loss on the trade date on the basis of First In First Out ('FIFO') method.

2.15 Tax (Continued)

Current tax

Current tax expense is recognised on an annual basis under the taxes payable method, based on the estimated tax liability computed after taking credit for allowances and exemption in accordance with Income-tax Act, 1961. In case of matters under appeal due to disallowance or otherwise, full provision is made when the said liabilities are accepted by the Company.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis.

Deferred tax

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future. However, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty supported by convincing evidence of realisation of such assets against future taxable profits. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonable / virtually certain (as the case may be) to be realised.

Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

2.16 Earnings per share

Basic earnings per share is computed by dividing the net profit attributable to the equity shareholders by weighted average number of equity shares outstanding during the reporting year.

Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends if any and any attributable tax thereto for the period.

The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

The number of equity shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share and also weighted average number of equity shares which would have been issued on the conversion of all dilutive potential shares. In computing diluted earnings per share only potential equity shares that are dilutive are included.

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

25 Segment reporting

The Company's operations predominantly relate to providing asset management services. It acts as an investment manager to schemes launched by the Mutual Fund and provides advisory services to other funds. It also provides Portfolio Management Services to corporate, high net worth individuals and ICICI Prudential Venture Capital Fund & acts as a investment manager to Alternative Investment Funds. Accordingly, the asset management business is split into Fund Management & Advisory and Portfolio Management Services as primary reporting segments.

Secondary segment reporting does not require separate disclosure as all activities of the Company are within India.

The accounting principles consistently used in the preparation of the financial statements are also consistently applied to record income and expenditure of individual segments.

Income and direct expenses in relation to segments are categorized based on items that can be individually identifiable to that segment. Certain expenses such as depreciation, etc. are not specifically allocable to specific segments as the underlying assets or services are used interchangeably. The Company believes that it is not practical to provide segment disclosures relating to such items, and accordingly they are separately disclosed as "unallocable expenses" and directly charged against total income.

Current assets, non current assets, current liabilities and non current liabilities to the extent directly identifiable to a segment have been categorized separately; others have been shown as "unallocable" in the total column. Other balance sheet items such as fixed assets and deferred tax asset are similarly not allocated to segments.
